So much potential here, I have a feeling I will be playing this game for years.. I don't see hellboy..... Just a series of 'riddles' with a picture, felt robbed at 79p. Pretty good game. Made it to round 200 something fairly quickly. It does get way harder throughout the rounds, so that's good.. This game is a gem of point-and-click adventures. The hand-crafted backgrounds of the world really give the whole game a great personality (even if the character art was a bit too simple for the beautiful scenery). The storyline is creative and engaging enough that I couldn't stop playing and made it through the game in about 8-9 hours over three days. Currently playing through it for the achievements and making sure I find all the clever jokes buried inside.

8.5/10, am playing again.. I love this game. I love it. The artwork is beautiful to me and so is the music. I like the theme, but remember it's a GAME. I wasn't sure I would like it after reading some of the not so recommending reviews, so I tried the demo first, I was hooked. Is it repetitive? Yes. Honestly if you don't like repetitiveness then this isn't the game for you. If you do not like macabre themes then don't play this game. If you cannot play a game for the joy of just playing and enjoying a game then this is not the game for you. However, if you can play a game and let it be a game in whatever theme you enjoy and you enjoy the macabre, point and click games, then get this game!

Honestly, this game feels very bare bones (sorry), and just wasn't fun. The graphics are okay, the animation is minimal, the soundtrack is pretty good. The enemies are dull, and are largely just palette swaps of previous enemies. The boxing in of the screen space is hugely irritating, and detracts from the immersion in the game. The character's lack of animation really sucks the life out of things too.

This is my favourite genre, and I bought After Death at 50% off but still have requested my money back. With competition out there like Axiom Verge and a plethora of others, this just doesn't cut the mustard.. I loved it. I just wish the romances were fleshed out a little more. Perhaps that's not the main goal of the story (seeing its high direction toward ethical and political conundrums), but if the romance portion is available, I'd like more! :). This is the best out of GTA franchise so far. Beautiful graphics, dialog is oscar worthy and sound effects and soundtrack is pretty similar to cupheads quality. I'm giving it a solid 4 out of 20.. Crashday: Redline Edition is what You could expect from a 'remaster' of the game. From eyes of a child who played it back in the day it's basically the same game, same graphics, same maps, same cars, same challenge (that may look a little easier since time passed) and of course still THE SAME EPIC ROCK AND METAL MUSIC! Great fun and still a great game to spend free afternoon on some car carnage.

From eyes of an newcomer to the game, the game may look a little rough around the edges, a little '♥♥♥♥♥♥♥♥♥♥' but learnable movement sliding and gaining momentum of cars, and a little short career mode. The game gives You a little more to play with, online matches, challenges, map creator and Steam Workshop Support. But even after all the short comings this game has, it's still a fantastic experience and a blast of fun for everyone to play!. Voted to be on steam through Greenlight

Thanks Community... ya bunch of reckless\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665. The gameplay is very funny,. Good game with a simple but combat system based on physics and mouse movments that bring a lot of depth to the game.

Ther eis a dugeon crawler mode as well as a pit fight arean career mode.

Its a pretty hardcore game. Combat is better then most AAA games and the limited content they have now is enough for a your money and more.

Still in alpha with a small dev team but the game is very polished and I havent seen a bug yet.

Would love it if the core of this game was made into a MMO or rust like game.. In a few short minutes the player is led through a life filled with difficult moral choices that have long-lasting influence on their being and their environment. A philosophico-existential autobiographical masterwork.
